

DIGITAL TORQUE METER - HP-100

HP series torque tester is designed and manufactured for a variety of torque an intelligent measurement tester. Mainly used for measuring and testing a variety of electric screwdriver, pneumatic screwdriver, torque screwdriver and torque wrench. Correcting electric screwdriver, pneumatic screwdrivers, torque screwdrivers and torque wrenches, torque cap torque to confirm need, you can also measure the torque of other tools, such as a variety of fixtures.

Feature

- Automatic alarm settings.
- Can be stored and printed 10 test data.
- Automatic calculation of the average of the data stored.
- Can easily switch between Kgf.Cm, Lbf.in, Nm.
- With peak hold function.
- Shows exactly lithium battery.
- 1-60 minutes adjustable-free operation of automatic shutdown of the power
- Torque for both clockwise or counterclockwise can be measured.
- A touch of a button, durable, reliable, easy to operate.
- Measured data can be imported to a computer
- The torque meter simple operation, high accuracy.
- Suitable for a variety of industrial products and service enterprises.

PERFORMANCE CHARACTERISTICS

Measuring range	1~100.0 kgf.cm
	0.1~10.00 N.m
Accuracy	±0.3%
Sampling rate	500HZ
Power supply	Lithium Battery:7.4V
Charging time	>8 hours
Full power continuous use	45 hours
Battery Life	≥500 times
Size	120mm x 230mm x 50mm
Weight	3KG
Charger	Input:AC 220V 50HZ Output:DC 15V 500mA
Operating temperature	10°C-40°C
